

Description

Dunes is a decorative paint effect inspired by the expanse of the desert. Its texture and finish are ideally suited to create interiors with an innovative fusion of ethnic tradition and stylish decor.

Recommended For

Interior applications on plaster, embossed wall coverings, gypsum board, concrete, cement rendering, brickwork & block work.

Key Features

- Textured polychromatic finish
- Soft texture
- Low VOC
- Odorless

Physical Properties

Solvent Type	Waterborne
Finish Type	Fine textured finish
Spreading Rate	Approximately 6-7 m ² /kg/coat – 2 coats required
Average Dry Time	Touch-dry in 1/2 hour based on ASTM D 1640
Recoat	After 6-8 hours
Flash Point	Not Applicable
Dry Film Thickness	60 - 70 microns depending on application
Thinner	5% water
Density	1.20 g/cm ³
Viscosity	3500 - 6000 cP (Spindle 3 / Speed 10)
Percent solids by volume	33%
Percent solids by weight	44%
VOC	29g/L - Compliant with EU 2010 regulations maximum of 30 g/L.
Colors	Available in 7 bases: BL-200 , RG-201, NR-202, JN-203, VR-204, BLE-205, VL-206

Surface Preparation

All surfaces must be cured, clean, dry, and free from dirt, dust, rust, stains, grease, oil, mildew, wax, efflorescence, bond-breakers and other contaminants. Remove all loose, peeling, or chalky paint by sanding, scraping, or any other appropriate methods. Repair all cracks, holes, and other surface imperfections with a suitable patching material. Repaired surfaces should then be sanded smooth, dusted clean and primed with a suitable Colortek primer.

New plaster or masonry surfaces must be allowed to cure (28 days) before applying base coat. Cured plaster should be hard, have a slight sheen and maximum pH of 10. A soft, porous or powdery plaster indicates improper cure. Knife off any protrusions and prime the plaster before and after applying patching compound. Poured or pre-cast concrete with a very smooth surface should be etched or abraded to promote adhesion, after removing all form release agents and curing compounds. Remove any powder or loose particles.

CAUTION: Scraping or sanding surfaces of older buildings may release dust containing lead or asbestos. **EXPOSURE TO LEAD OR ASBESTOS CAN BE VERY HAZARDOUS TO YOUR HEALTH.** Always wear appropriate personal protective equipment during surface preparation and finish clean-up of any residues by water-washing all surfaces.

Primer Systems

SURFACE TYPE	RECOMMENDED COLORTEK PRIMER
Drywall	Colortek Primer
Porous Masonry	Colortek Sealer, Colortek Primer
Non-Porous Masonry	Colortek Primer or Colortek Undercoat
Wood	Colortek Undercoat or Colortek Wood Primer
Metal	Colortek Adhero, Adhero Quick Dry, SX47 StopRust, AquaZinc

Application Conditions

Do not apply at temperatures below 5 °C or when rain is expected.

Application Method

- Apply two coats of CoAcryl tinted to the same color as Dunes on a properly primed and clean surface.
- Apply Dunes with a spray gun (HVLV) equipped with an upper tank and 2.5 mm diameter nozzle, pressurized to 2.4 atmospheres, at a distance of 15-30 cm from the surface.
- Apply the first coat, working in a horizontal direction and let the surface dry for approximately 6 to 8 hours based on existing temperature and humidity site conditions. Apply a second coat working in a vertical direction to achieve an even coverage of the surface.
- For protection apply a coat of COLORTEK® 4005 Varnish (available in Flat, Satin or Gloss) or with Colortek Dark Matter Varnish.

Pack Size

- 1 US Drum – 16kg
- 1 US Gallon – 3.2kg
- 1 US Quart – 0.8 kg

Shelf Life

24 months from the date of production.

Storage and Handling

Care should be taken to avoid spillage. Store in a dry area. Protect from freezing. Extreme temperatures may cause paint to become unusable. For example: freezing and thawing may cause paint to gel, and high heat may cause solid skin to form.

Safety

Use under well ventilated conditions. Do not breathe or inhale spray mist or sanding dust. Avoid skin contact; spillage on the skin should immediately be removed with suitable cleanser, soap and water. In case of eye contact, flush immediately with water for at least 15 minutes and seek medical attention immediately. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

Cleaning

Remove as much leftover product as possible from the application equipment before cleaning. Clean equipment immediately after use with warm soapy water and rinse thoroughly. Do not empty product into drains or watercourses.

Technical Assistance

Available through your local COLORTEK® Design Center or through your COLORTEK PAINTS® authorized distributor. For the location of the retailer nearest you, email us at info@colortek.eu or check our website www.colortek.eu.
